American Solar Deployment Grows at Record Pace Solar has seen massive growth since 2010. There are now 262 gigawatts direct-current of solar capacity installed nationwide, enough to power 45 ...

We manage the flow of Texas" power supply. 90% of Texas power load 1,460+ power generation units 55,000+ miles of transmission lines managed and monitored System Outage

These power production records (all of which are current through April 17) are the direct result of a rapid capacity buildout. According to the Energy Information Administration (EIA), the U.S. ...

The region"s latest solar peak record was set April 16, when output hit 12,530 MW, more than double the April 2024 level and the second record in a week. Solar"s share of the MISO market ...

On Feb. 13, 2024, Texas set a new solar record with 16.7 GW generated in ERCOT, making up 36.1% of the grid--surpassing the previous high set just weeks earlier.

Tuesday 13 February was a record-breaking day for Texas solar, with ERCOT generating a peak of 16.7GW of electricity from solar sources.

Globally, 347 gigawatts (GW) of photovoltaic (PV) capacity were added to power generation in 2023, which has made it a record-breaking year for solar power generation, revealed a ...

Together, solar and battery storage account for 81% of the expected total capacity additions, with solar making up over 50% of the increase. Solar. In 2024, generators added a record ...

Solar (photovoltaic) panels cumulative capacity Solar and wind power generation Solar energy generation by region Solar energy generation vs. capacity Solar photovoltaic module prices vs. ...

Based on 1-minute averages, and includes dynamic transfers. Values are subject to revision as data is refined.

Peak solar power generation record

Indicates the highest amount of renewables serving peak electricity demand on any given day.
