---

By utilizing primary data from an Italian manufacturer, the report “Environmental Life Cycle Assessment of Passivated Emitter and Rear Contact (PERC) Photovoltaic Module Technology” provides an in ...

The Environmental Impact Statement (EIS) Database provides information about EISs prepared by federal agencies, as well as EPA's comments concerning the EISs.

On July 10, the Bureau of Ecology and Environment of Yibin City, Sichuan Province, issued an announcement on the approval of the environmental impact assessment of the project of ...

A desert photovoltaic park ecological environment effect indicator system was developed using the DPSIR framework to assess the ecological impact of the Qinghai Gonghe Photovoltaic Park, a typical ...

Guidance is given for the definition of the energy payback time (EPBT), the non-renewable energy payback time (NREPBT), and the environmental impact mitigation potentials (IMP).

The environmental issues related to producing these materials could be associated with solar energy systems. A number of organizations and researchers have conducted PV energy payback analysis ...

It illustrates how an EIA report is structured. A report on a real project will be longer, and will include images, sitemaps, and other data gathered during the assessment.

Life Cycle Assessment (LCA) is a structured, comprehensive method of quantifying material and energy flows, including the associated emissions caused in the life cycle of goods and services.

To ensure the sustainability of solar energy projects, conducting environmental impact assessments is crucial. These assessments involve a comprehensive process of identifying and ...

Most software packages performing the LCIA offer quantification of a range of environmental impacts, including greenhouse gas emissions (GHGs), heavy metals, acidification potential, eutrophication ...
