Each quarter, the National Renewable Energy Laboratory conducts the Quarterly Solar Industry Update, a presentation of technical trends within the solar industry.

The solar power industry is experiencing rapid growth. Revenue for solar installation services has grown at a 7.9% CAGR to reach \$21.8 billion over the past five years, with a 4.9% increase in 2024 alone.

Solar Installed System Cost Analysis NLR analyzes the total costs associated with installing photovoltaic (PV) systems for residential rooftop, commercial rooftop, and utility-scale ...

o The United States, despite being a leading PV market, is below the global average of other leading markets in terms of PV generation as a percentage of total country electricity ...

The solar photovoltaic (PV) installations market reached approximately 1,177 gigawatts (GW) of installed capacity by the end of 2022, growing by 25% from the previous year. Asia leads the ...

Solar Photovoltaic market was valued at USD 323.5 billion in 2025. The market is expected to grow from USD 345 billion in 2026 to USD 694.5 billion by 2035, at a CAGR of 8.1% from 2026 to 2035. ...

Expert industry market research on the Solar Panel Installation in the US (2015-2030). Make better business decisions, faster with IBISWorld's industry market research reports, statistics, analysis, ...

Despite an industry rush to bring projects online this year to qualify for tax credits, equipment constraints are holding back installation growth. The commercial solar segment grew 9% ...

Growing demand for renewables-based clean electricity coupled with government policies, tax rebates, and incentives to install solar panels is expected to drive the growth of solar PV panels industry in ...

In the United States, residential solar installations demonstrated robust growth with a 30% year-over-year

Photovoltaic panel installation industry

increase in 2021, while India achieved a milestone of over 50,000 solar-powered ...
