The facility, slated to begin operations in late 2026, will focus on the final production stages for the company's Series 6 solar modules, which are initially manufactured abroad.

Canadian solar energy company Heliene has announced plans to expand its US operations with a new solar panel and photovoltaic (PV) cell factory. Heliene's CEO Martin Pochtaruk ...

From pv magazine USA First Solar said in its third-quarter 2025 earnings report that it will open a new 3.7 GW annual-capacity solar module finishing line in the United States.

First Solar, an American company that emerged from the Midwest, will increase its U.S. presence with a new facility in South Carolina.

First Solar, the US's largest solar panel maker, will open a 3.7 GW US factory to finish solar panels started overseas.

Construction of the proposed factory is expected to begin in the first half of 2023, and it's anticipated that the first panel will be produced and available to the market by the end of 2024.

"Our new solar panel assembly plant will allow us to produce 1 GW crystalline silicon PV panels for markets in the U.S. We are grateful for the help and support of the South Carolina team ...

The US manufacturer First Solar plans to build a new 3.7 GW factory, aimed at pushing more CdTe solar cell technology into the US market.

After ramping up its newly commissioned factories in Alabama and Louisiana, it is expected to operate about 11 GW of active manufacturing capacity in the Unites States and over 14 ...

Photovoltaic panel manufacturer sets up branch factory

At the beginning of February, photovoltaic (PV) solar cell producer ES Foundry, based in Greenwood, South Carolina, opened its new 400,000-square-foot manufacturing facility.
