How much does a solar panel cost?

Note: Costs are expressed in constant 2024 US\$ per watt. Global estimates are used before 2010; European market benchmarks thereafter due to limited data availability. Solar photovoltaic module prices refer to the cost of the solar panel itself, and do not include installation or other system components.

Where did photovoltaic cost data come from?

Historical photovoltaic cost data between 1975 and 2003 has been taken from Nemet(2009),and between 2004 and 2009 from Farmer &Lafond (2016).

How much does a solar module cost?

Average price of solar modules, expressed in US dollars per watt, adjusted for inflation. Data source: IRENA (2025); Nemet (2009); Farmer and Lafond (2016) - Learn more about this data Note: Costs are expressed in constant 2024 US\$ per watt.

How does pvxchange differentiate between the main technologies available on the market?

In doing so, we differentiate between the main technologies available on the market. Since 2009, pvXchange has provided a unique price index for the european market, which has become an invaluable industry tool. Today, it is hard to imagine the industry without our price index, trend data, and in-depth analysis and commentary.

Understanding the Secondary Solar Market Landscape Tracking the price trend chart of old photovoltaic panels has become critical for solar developers, recyclers, and sustainability-focused organizations. As global solar ...

Generally, traditional solar photovoltaic (PV) panels, including both monocrystalline and polycrystalline types, are frequently removed and resold. Thin-film panels may also be dismantled, though ...

The photovoltaic panel price trend chart reveals a fascinating story of technological advancement and market dynamics. Over the past decade, solar module costs dropped 82% globally, but recent supply chain ...

Old solar panels might not generate electricity anymore, but they still have value. By understanding the scrap

value of solar panels and knowing where to sell them, you can turn end-of-life panels ...

Solar photovoltaic panel prices Average price of solar modules, expressed in US dollars per watt, adjusted for inflation.

ABSTRACT Tracking salvage values can help to represent the reliability of a particular technology, the manufacturer and model of PV modules. There exists a secondary market for used modules and new ...

How much do solar panels cost per watt? About \$8.70 per watt and were about 15% efficient. Today, solar panels cost about \$3.00 per watt on average and are between 19% and 22% efficient. The price of solar panels could ...

Why Consider Dismantling and Selling Used Photovoltaic Panels? Solar asset managers are waking up to the EUR3.2 billion secondary market for functional used panels. Take Müller Energy Solutions in Bavaria - they ...

Panel Composition and Material Recovery The composition of solar panels directly affects recycling costs and the value of recovered materials. Crystalline silicon panels, which constitute about 90% ...

PRICE INDEX | January 2026 Photovoltaic Price Index Every month we publish a current price index on the development of wholesale prices of solar modules. In doing so, we differentiate between the main ...
