-----

Applus+ wind services comprise technical expertise and independent advice in wind engineering, wind consulting, QA/QC, and wind turbine inspection, among others, for utility-scale projects.

Surpassing 900GW total installed generation capacity worldwide at the end of 2022, wind power is an effective response to the urgent call for sustainable alternatives to fossil fuels.

The present study analyzes the wind energy potential of Qatar, by generating a wind atlas and a Wind Power Density map for the entire country based on ERA-5 data with over 41 years of measurements.

The present study analyzes the wind energy potential of Qatar, by generating a wind atlas and a Wind Power Density map for the entire country based on ERA-5 data with ...

The results indicate that the environmental parameters, led by a 5.06 m/s wind speed mean, allow the production of wind energy in the area with an annual CO2 savings of 6.813 tons in a 17 MW wind ...

We analyzed the wind energy potential along the onshore and offshore areas of Qatar using 40 years (1979-2018) of hourly wind data extracted from the ECMWF Reanalysis v5 (ERA5) database. ...

The Global Wind Atlas is a free, web-based application developed to help policymakers, planners, and investors identify high-wind areas for wind power generation virtually anywhere in the world, and then ...

A record-breaking 20-megawatt (MW) offshore wind turbine has been connected to China's grid in the Fujian Province.
