What are the dimensions of a 60 cell solar panel?

The dimensions of a 60 cell panel are 4.6' x 16' (1.4 m x 4.8 m), while for a 72 cell panel are 5' x 18' (1.5 m x 5.5 m). Dimensions are critical when figuring out how much space you have for solar panels in your yard or roof. Or how much room you need for an array in your RV. In general, 60-cell solar panels cost less than 72-cell panels.

What is the difference between 60-cell and 72-cell solar panels?

In general, 60-cell solar panels cost less than 72-cell panels. The cost per watt of power these two types of panels generate is relatively the same. But because 60-cell panels are smaller, they're typically cheaper per watt than 72-cell panels. The 60-cell panels are about 1.5 pounds lighter than the 72-cell panels.

Choosing the right solar panels for your home can be an overwhelming task. With so many options to pick from, it's hard to know whether 60-cell or 72-cell panels are better suited for you. Making the ...
