-----

With a significant World Bank loan, Dominica embarks on creating a resilient electrical grid to connect its geothermal power plant with the capital, aiming to phase out fossil fuels.

You need real-time information from smart meters, sensors and other devices -- plus the analytics to make sense of it all. You are clear on the vision, but worry about how to pull it off with aging ...

As EPC contractor we Design and Build Solar and Storage Plants.

Installation is already finished, and final testing is underway from 30 April to 4 May 2025. The project represents not only a technological breakthrough but also affirms Dominica's institutional ...

The grid is owned and operated by Dominica Electricity Services Limited (DOMLEC), which serves approximately 35,000 customers across the island. The grid's history is a story of expansion from ...

The Dominica Schools Microgrid Project serves as a proof point for how solar and storage systems can preserve community vibrancy through bolstering energy resilience amid intensifying climate-induced ...

Dominica operates a vertically integrated system where a single utility manages the journey of an electron from the turbine to the household meter. Provides approximately 70-75% of current annual ...

Join Smart Energy, Huawei Digital Power, and DOMLEC as we unpack the technical journey, lessons learned, and practical insights from this landmark project.

Under a leasing arrangement with the Government of the Commonwealth of Dominica (GoCD), DOMLEC will be responsible for the operation and maintenance of the BESS, ensuring its ...
