-----

In 2022, only 3% of Tunisia's electricity is generated from renewables, including hydroelectric, solar, and wind energy. While STEG continues to resist private investment in the ...

In 2009, the Tunisian government adopted "Plan Solaire Tunisien" or Tunisia Solar Plan to achieve 4.7 GW of renewable energy capacity by 2030 which includes the use of solar photovoltaic ...

The Government of Tunisia is taking steps to diversify its energy generation mix by bringing on hydropower and solar energy.

In 2010, Tunisia launched the Prosol Elec program to promote the installation of solar panels on roofs connected to the low-voltage grid through subsidies and loans.

In Tunisia, over 95% of electricity generation relies on gas, while all renewable sources--hydropower, solar, and wind--combined account for about 4% only (Figure 1). The ...

Recent initiatives in Tunisia demonstrate how transitioning to renewable energy sources could bring affordable power to communities and reduce poverty. However, these efforts also ...

With an average of over 3,000 hours of sunlight annually, Tunisia is ideally positioned to harness solar power to meet its energy demands sustainably. The importance of solar energy in Tunisia lies in its ...
