Where can solar panels be seen in Islamabad?

Solar panels can be seen on the rooftops of houses in Islamabad. Pakistan is in the midst of a solar boom that has rapidly turned the country into one of the world's largest new adopters of this renewable energy source, according to data from the global energy think tank Ember.

Which solar panels are available in Pakistan?

High-capacity models (530-620W) -- including Mustang and Jollywood N-Type versions, offering premium output at PKR36-38/W, or PKR19,800-20,800 per panel. SunPower(USA) solar panels--especially the Maxeon and Performance series--are now available in Pakistan, offering exceptional efficiency and elite build quality.

How much does solar cost in Pakistan?

This became apparent last year, when solar imports to Pakistan more than tripled from just one year earlier, approaching \$2.1 billion, according to data from Renewables First, an energy and environment think tank in Islamabad.

Why did Pakistan adopt solar power?

Photo by Hexzain /Shutterstock. Solar adoption in Pakistan resulted from a "perfect storm" of supply and demand. On the demand side, an unprecedented hike in electricity tariffs -- up 155% in just three years -- rendered grid power unaffordable for many people and businesses.
