The European Commission has approved a significant EUR700 million (approximately \$763 million) aid scheme to propel the deployment of large-scale energy storage across Spain, marking a ...

Spain has launched an ambitious EUR700 million (around \$796 million) program to increase its energy storage capacity. This plan will add 2.5 to 3.5 gigawatts (GW) of storage. It includes ...

The European Commission has approved a new aid scheme that will allow Spain to deploy large-scale electricity storage, both in hybridisation with renewable energy facilities and stand ...

Spain's Instituto para la Diversificación y Ahorro de la Energía (IDAE) has issued a provisional funding proposal for the country's first call for innovative energy storage projects,...

Accelerated growth of energy storage facilities in Spain, including large hybrid projects with renewables. National and European industrial innovations support advanced solutions adapted to European ...

The provisional resolution published by the Institute for Energy Diversification and Saving (IDAE) this week marks a milestone in the national strategy, selecting 144 innovative projects ...

A total of 126 projects, representing 2.2 GW of energy storage capacity and 9.4 GWh of storage, will be funded. These projects are set to be completed by December 31, 2029, with a strict ...

A significant winner is Iberdrola España, which was awarded energy storage projects in six autonomous communities in Spain for a total of EUR170 million (USD 198 million) to build batteries, ...

Spain invests EUR148.5M in solar-plus-storage projects, making battery systems mandatory for renewables and setting a new EU energy standard.

The scheme aims to deploy between 2.5 and 3.5 gigawatts (GW) of new storage capacity, enhancing the

Spanish solar energy storage project

flexibility and resilience of the national power system while enabling deeper integration ...
