The Cabinet of Ministers has approved the award of tenders for the installation of independent battery storage systems at 16 electrical substations across Sri Lanka, a major step ...

Volfpack Energy develops supercapacitors powered by a unique graphene formula, boasting over 4x the typical capacity. With their reported long lifespan and rapid response, they're well suited to manage ...

We are Volfpack Energy, a Sri Lanka-based company driving the future of sustainable energy storage. Our team of innovators designs advanced supercapacitors that charge faster and store more energy ...

Their supercapacitors are designed to deliver 4x the energy density at nearly half the cost of current alternatives. If it works at scale, it's not just an upgrade--it's a game-changer.

By Sulochana Ramiah Mohan Cabinet approval has been granted to award tenders for the installation of a 160 MW / 640 MWh Battery Energy Storage System (BESS), aimed at enabling the ...

Based on an extensive evaluation of various energy storage technologies, four (4) key solutions have been identified as the most suitable options for Sri Lanka which can be implemented over the next ...

Summary: Explore how Sri Lanka's energy storage projects are revolutionizing renewable energy adoption, stabilizing grids, and creating opportunities for industrial growth. Discover key trends, real ...

This novel energy storage material by JKR has superior properties and is provided in a form that is readily conformable to many shapes and sizes, making it particularly suitable in various electronic ...

The supercapacitor market in Sri Lanka is regulated by policies that promote technological innovation and energy storage solutions. The government encourages research and development in ...
