NEW YORK - To recognize Climate Week, the New York State Office of Parks, Recreation and Historic Preservation (State Parks) today announced that a new solar array will be ...

Silicon Ranch and Meta are bringing a new 100-megawatt solar power plant to South Carolina, along with a land stewardship plan.

The Ivanpah Solar Electric Generating System is a concentrated solar thermal plant located in the Mojave Desert at the base of Clark Mountain in California, across the state line from Primm, Nevada.

The Fort Edward Solar Project is being developed by the company Boralex. It would generate 100 megawatts of power--enough to supply thousands of homes and create more than a ...

Estill Solar Park is located approximately 90 miles west of Charleston in southeastern South Carolina. Located entirely within Hampton County, the solar park complements the area's timber and ...

Badger State Solar is designed to generate clean power for Wisconsin for 25 to 40 years. At the end of project life, facilities will be removed, and the land will be restored for agricultural use.

Located in central Michigan's Branch County, the 150-megawatt solar park has nearly 347,000 solar panels and generates enough clean energy to power approximately 40,000 homes.

Boralex's Fort Edward Solar project is a 100 MW photovoltaic solar energy generation facility, that will have an estimated footprint of 750 acres, including solar arrays and other project features to be ...

The Aurora Solar Plant in Minnesota has been operating since 2017 and can generate more than 210 million kWh per year, equivalent to the needs of more than 17,000 households.

State Solar Ecological Power Generation Park

Alabama Solar LLC (Alabama Solar), a subsidiary of EDP Renewables North America (EDPR), is proposing to develop the Alabama Solar Park (Project) in Genesee County, New York (Figure 1).
