According to the government, the project will increase the country's renewable energy capacity and contribute to curbing power outages. This initiative aligns with a series of recent large ...

Sanctions lifted in June 2025 have allowed Syria to re-enter the global market, with the first crude shipment in 14 years. Major agreements include a \$7 billion (£5.7 billion) power generation ...

ACWA Power Syria Country General Manager Moyad Saman said the project will combine reliable power generation, cost competitiveness and renewable energy integration, and cultivate local talent ...

Well, there you have it - Syria's energy future isn't about choosing between survival and sustainability. With smart storage solutions, it can achieve both simultaneously.

The agreement provides a framework for conducting detailed technical and commercial studies on existing power plants and the national grid, as well as evaluating and implementing a ...

Solar-powered desalination plants integrating 20MW PV arrays with 80MWh storage--a potential solution to both energy and water crises. First pilot launches in Latakia this September.

The first plant will have a capacity of 100 MW without battery storage, while the second 100 MW plant will include energy storage batteries, with their locations to be finalised through joint ...

By combining solar, wind, and storage, the agreement signals a shift toward a more sustainable and resilient energy system for the country. ACWA Power and Syria's Ministry of Energy sign JDA to ...

On May 29, 2025, President Ahmad al-Sharaa witnessed the signing of a \$7 billion memorandum of understanding in Damascus, marking the largest post-war infrastructure investment ...

Damascus launches a fixed-tariff scheme for 2-10 MW green power and signs a deal with 20Solar Energy to

Syria 2025 Energy Storage Project

build twin 100-MW solar plants, one with battery storage. Syria has taken its most ...
