TAIPEI (Taiwan News) -- Legislation passed by the Kuomintang and Taiwan People's Party on Nov. 14 has significantly tightened environmental impact assessment requirements for solar ...

Discover how Taiwan's renewable-energy projects are powering TSMC's microchip fabs, crucial for the island's economy and geopolitical security.

A Taipei-based renewable energy firm has commissioned the world's largest offshore floating solar power plant.

The plant, the last of its kind in Taiwan, is set to be closed next year. There's no realistic prospect of Taiwan significantly expanding its hydroelectric capacity.

Listed below are the five largest upcoming Solar PV power plants by capacity in Taiwan, according to GlobalData's power plants database. GlobalData uses proprietary data and analytics to ...

As the island phases out nuclear power and faces challenges in integrating solar energy with storage solutions, it is also tackling regulatory and land-use hurdles to expand its solar capacity.

In addition to the construction of the largest solar power plant on the salt fields of Tainan, Taipower also continues to promote its rooftop photovoltaic systems for buildings and to carry out its development ...

Taiwan faces significant hurdles in meeting its 2025 renewable energy targets. Explore the key challenges in wind and solar power development putting this goal at risk.

The Taiwanese government is considering two major solar cell systems: Crystalline silicon (c-Si) and Cadmium Telluride thin-film (CdTe). The c-Si module is relatively mature and ...

## Taiwanese media discusses solar power station construction

Taiwan's solar power industry is forging ahead amid an ambitious drive to help reshape the nation's topsy-turvy energy landscape, but the journey remains fraught with physical constraints, industrial ...
