The Taiwanese government is considering two major solar cell systems: Crystalline silicon (c-Si) and Cadmium Telluride thin-film (CdTe). The c-Si module is relatively mature and ...

Taiwan delays its solar power target to Nov. 2026 due to ground-mounted project challenges. The government focuses on stable energy supply and rooftop solar success.

What is Taiwan's floating solar project? In addition to its remarkable scope, the floating solar project significantly advances Taiwan's decarbonization goals, which include reaching net-zero emissions by ...

TAIPEI (Taiwan News) -- Legislation passed by the Kuomintang and Taiwan People's Party on Nov. 14 has significantly tightened environmental impact assessment requirements for solar ...

In July, Typhoon Danas damaged floating solar installations in southern Taiwan, stoking public concern over environmental risks and regulatory gaps. Media reports and online posts alleged...

Taiwan faces significant hurdles in meeting its 2025 renewable energy targets. Explore the key challenges in wind and solar power development putting this goal at risk.

Abstract: The main elements in Taiwan's green power shift are reviewed, with focus on developments since the election of the DPP government in early 2016 and its commitment to phase out nuclear ...

Both projects brought about total production capacity of 108 MW, reinforcing BCPG as a major accelerator of energy transition towards sustainable and reliable power in Asia.

MONEY FM 89.3 Recharge Power Awarded Taiwan's Largest Solar-Plus-Storage EPC Project from HEXA Renewables - We are bringing Money FM 89.3 near you in Singapore.

Taiwanese media talks about solar power station projects

By the end of 2024, our country's renewable energy installations had a total capacity of 21,067MW, of which the hydropower is 2,123 MW, geothermal power is 7 MW, solar power is 14,281 ...
