Mitrex's Solar Roof is designed to look essentially indistinguishable from traditional roofing materials such as asphalt and slate shingles, while simultaneously generating clean energy. The...

For larger gatherings, there is a terrace on the roof of the building, which is also shaded by a photovoltaic canopy. Due to this marriage of solar technology and open-air spaces, the project is ...

Ever walked through a sunlit building corridor and thought, "This space could literally power itself"? That's exactly what photovoltaic corridor grille panels are making possible.

Solar shingles or photovoltaic shingles, are solar panels designed to look like and function as conventional roofing materials, such as asphalt shingle or slate, while also producing electricity.

A moving wall that evokes a sailing ship and a roof canopy modelled on a banana tree feature in this roundup, which collects 10 buildings that challenge conventional ways of fitting solar...

Embracing and harnessing solar energy, this list provides a selection of residential buildings, office buildings, and an innovative solar pavilion, designed with integrated PV panels.
