Meta description: Explore why domestic used solar panels are becoming hot exports, with 2025 data on market trends, regulatory challenges, and innovative reuse strategies driving this \$2.1B global trade.

This report includes summary data for the photovoltaic industry from annual and monthly respondents. Data include manufacturing, imports, and exports of modules in the United States and its territories.

Discover the latest rankings and insights into the top-tier solar panel manufacturers of 2024. Explore updated rankings and key information on leading companies in the solar energy industry.

Top PV Markets In 2024, China, the EU, and the United States continued to represent more than 80% of annual PV installations. However, large growth occurred in other markets, ...

Below, you will find a list of the 15 best exporters of solar power sorted by highest international sales. The top exporters shown above generated 94.7% of all solar power components sold on international ...

This guide compares leading solar panel manufacturers worldwide, examines the resurgence of US manufacturing, and shows how businesses can source panels wholesale.

Today, China's share in all the manufacturing stages of solar panels (such as polysilicon, ingots, wafers, cells and modules) exceeds 80%. This is more than double China's share of global PV demand. In ...

Data source: U.S. Energy Information Administration, Form EIA-63B, Monthly Photovoltaic Module Shipments Report Note: Includes both domestic shipments and exports.

TrendForce says in a new report that the top six module manufacturers in 2022 shipped around 205 GW to 211 GW of PV panels, accounting for 76% to 78% of 270 GW of module demand last year.

The top ten domestic photovoltaic panel exports

The photovoltaic (PV) sector continues to dominate renewable energy markets, with China maintaining its stronghold as the world's leading exporter of solar panels.
