According to the companies, the Storey County location will be "the largest behind-the-meter solar project in the world", producing 127MW and including a 240MWh battery storage system.

International Electric Power is planning a 944 MW gas plant in Pennsylvania to power a data center. It will integrate with battery storage and backup power, and avoid interconnection with ...

Upon completion in 2022, this system, sized at 20 MW/40 MWh, is believed to be the largest behind-the-meter BESS in North America, based on publicly available data.

A new \$51 million Tesla Megapack battery energy storage system is now operational in Kingman, Arizona. Developed by Ameresco, Inc., the 50 MW/200 MWh installation is the largest ...

Attention in recent years in the storage industry has primarily been on utility-scale storage, but this briefing quantifies the current scale and characteristics of what we deem hybrid storage assets ...

Technology infrastructure company Switch and asset management firm Capital Dynamics have announced the groundbreaking of three developments in Nevada, one of which is claimed to be ...

Ameresco recently announced the development and commercial operation of a 50-MW/200 MWh battery energy storage system (BESS), the largest behind-the-meter (BTM) project in ...

On January 15th, 2024, the 61MW/123MWh Nangang Energy Storage Power Plant Project, the largest behind-the-meter energy storage power plant in China, was successfully connected to the grid at full ...

With a rated output of 120 MW and a storage capacity of 240 MWh, the Jingjiang Special Steel project is now the largest customer-sited installation of its kind in Jiangsu.

The world s largest behind-the-meter energy storage power station

The Fresno-Clovis Regional Wastewater Reclamation Facility site is expected to be one of the largest behind-the-meter solar energy and battery storage projects in California, with 17 MW ...
