Which EV has a 402 mile range?

Tesla's Model S is in the top 10 with a 402 mile range and is one of the most popular EVs in the US. The cheapest new EV with over a 200 mile range is the Hyundai Kona Electric SE with a range of 200 miles and a list price of \$32,875.

What EVs have a 300 mile range?

The average EV range in the United States is close to 300 miles - there are many other new options available. The list of EVs with more than a 300 mile range includes: The Tesla Model Y Long Range RWD has a range of 337. Its list price is \$44,990, but if you qualify for the \$7,500 federal tax credit its starting price would be \$37,490.

How far can an EV charge?

Within the established baseline, EVs are capable of 200 km with a charging velocity of 21 km/h. This study introduces two hypothetical scenarios to test changes: the first extends the EV range to 400 km while maintaining the charging speed, and the second maintains the 200 km range but increases the charging speed to 42 km/h.

How far can an electric car go in 2024?

In 2024, the average range of an electric car was 283 miles compared to 2014 where this was 84 miles. And it doesn't stop here! Efficiency, charging speeds and battery longevity have all seen incredible improvements - making the choice to switch to an EV easier, even for the more sceptical consumers.

Learn more about electric car ranges - including a 2025 EV range comparison and the cheapest long-range EV.

The region has seen significant investments in EV charging stations, with Shanghai and other cities leading in the deployment of fast-charging networks. This extensive charging infrastructure boosts ...

What is electric car range? What is EPA range? What does WLTP mean? Here's a primer on all things related to EV range.

Complete EV range guide 2026: WLTP vs real-world, winter impact, maximising range. Average EVs now

Tiraspol electric vehicle range

300+ miles. Tips & comparisons.

The Tiraspol Electric Vehicle Energy Storage Battery Company isn't just selling cells - we're engineering the backbone of tomorrow's smart cities. With 14 patents in thermal management and a ...

Real-world data for electric cars currently on the market. Includes EV range and EV efficiency measured in actual usage based on data by Bjørn Nyland.

So, in the past research, there are relatively few coordinated location planning for electric vehicle charging stations and battery-swapping stations. Therefore, this paper proposes three types ...

In the face of rapid urbanization and the increasing number of vehicles, urban centers are struggling with traffic congestion. This study presents a dynamic travel strategy using the MATSim ...

Range of full electric vehicles cheatsheet. Quick reference for all plug-in hybrid en full electric cars.

electric vehicle (EV) s are the key technology to decarbonise road transport, a sector that accounts for over 15% of global energy-related emissions. Recent years have seen strong growth in ...
