The new fixed outdoor access control UWB application involves transponders at building entrances that allow access when certain portable UWB devices are nearby.

This section introduces the implementation of a mobile UWB-based onboard localization system with free structural anchors for multi-drones, and present the localization results from outdoor ...

Ultra-Wideband (UWB) outdoor base stations are designed for various applications across industries. Indoor types are optimized for enclosed spaces, while outdoor types are robust ...

Ultra-wideband (UWB) is a short-range RF communication technology which enables indoor positioning using a real-time location system with centimeter accuracy. Its main benefits include low latency, ...

Tri-radio WiFi 5 AP with 12 spatial streams and a selectable beamforming antenna, designed for high-density applications at large venues.

This report provides an in-depth analysis of the UWB Outdoor Base Station market, covering the historical period of 2019-2024 and projecting growth through 2033, with a base year of ...

The system presented in this article successfully demonstrated the target positioning and tracking process for a moving target in 3D UWB indoor and outdoor scenes.

When outside the range of the local RTK-GPS base station, the tag powers down the GPS unit in order to minimise current drain on the vehicle battery. The tag continuously transmits UWB radio pulses ...

This study provides a comprehensive outdoor ultra-wideband (UWB) dataset to examine the multipath effects in line-of-sight and non-line-of-sight (NLOS) environments for real-time localization.

Tonga UWB outdoor enhanced base station

LinkTrack S UWB high-precision navigation and positioning system, ultra wideband indoor and outdoor base station tag module \$112.15
