The University of St. Thomas invites qualified candidates to apply for a Postdoctoral Scholar position at the Center for Microgrid Research. The position will support the Center's research

Postdoctoral Positions in Energy Transitions bridging engineering, policy, and the social sciences. The research projects comprise three pillars of an overarc

Supported by favorable federal and local policies, microgrid projects can provide greater energy stability and resilience within a project site or community. This paper reviews major federal, ...

The University of St. Thomas invites qualified candidates to apply for a Postdoctoral Scholar position at the Center for Microgrid Research. The position will support the Center's research on reliability, ...

By 2035, microgrids are envisioned to be essential building blocks of the future electricity delivery system. The Strategy development process began with microgrid experts deliberating on areas the ...

The position focuses on the modeling and control of microgrids, specifically the development of low-voltage microgrid control schemes and Controller Hardware-in-the-Loop (CHIL) validation.

Develop a framework for dynamic formation of networked microgrids for optimized operations under both normal and emergency conditions. This project.

Education (ORISE) participant, you will join a community of scientists and researchers in an effort to support microgrid design projects at the Naval Postgraduate School.

The University of St. Thomas invites qualified candidates to apply for a Postdoctoral Scholar position at the Center for Microgrid Research.
