Our 1 GW project combines gas, solar, and battery storage to secure Kyiv's grid, cut emissions, and support critical services. Explore investment in this high-impact initiative.

Despite wartime risks and constant pressure on the energy system, Ukraine continues to develop a new decentralized, resilient, and modern energy infrastructure. One such project is the construction of a ...

This project is not only a step toward a new decentralized energy sector but also demonstrates the technological readiness of Ukrainian companies to implement complex ...

The construction of the Dnister pumped storage power plant is one of the most ambitious projects in modern Ukraine. The plant, when it reaches the designed capacity, would become the largest PSP in ...

The construction of distributed gas engine power plants is a critical component in rebuilding and reinforcing Ukraine's power system amid ongoing aggression.

The systems will enhance energy security, reduce blackout risks, and help stabilize the grid amid ongoing Russian attacks. Construction was completed in just six months--from March to ...

The DTEK Group has connected six new energy storage facilities to the Ukrainian power grid, each with a capacity of 20 to 50 MW. The energy storage facilities were installed in the Kyiv and ...

Ukraine's answer is Kaniv--a 1,000 MW pumped-storage plant that has been "under construction" for four decades. The Kaniv Pumped Storage Power Station in Cherkasy Oblast has a ...

Against the backdrop of energy transition and geopolitical challenges, Ukraine has reached a new energy milestone. DTEK, Ukraine's largest private energy company, in collaboration ...

Ukraine Energy Storage Power Station Construction Project

Ukraine's biggest private energy firm, DTEK, has launched a major battery storage facility that will bring power to hundreds of thousands of homes and strengthen the grid ahead of expected ...
