-----  
Will energy storage systems improve Ukraine's power grid?

DTEK reports that construction proceeded faster due to the need to complete the project before the onset of the autumn-winter period. Experts report that energy storage systems will provide Ukraine's power grid with additional resilience and stability.

What is Ukraine's largest battery-based energy storage system?

DTEK Group, in partnership with American company Fluence, has officially connected Ukraine's largest battery-based energy storage system to the grid. With a total capacity of 200 MW and the ability to store 400 MWh of electricity, the project is a milestone in Ukraine's energy resilience.

When will the new energy storage systems be operational in Ukraine?

DTEK Group aims to commission the new storage systems by September 2025. Once operational, these energy storage facilities will provide ancillary services to Ukraine's Transmission System Operator Ukrenergo. When will the following technologies start to tangibly disrupt your industry?

Does DTEK have energy storage facilities in Ukraine?

This was reported by DTEK's press service. The DTEK Group has connected six new energy storage facilities to the Ukrainian power grid, each with a capacity of 20 to 50 MW. The energy storage facilities were installed in the Kyiv and Dnipropetrovsk regions.

Ukrainian private utility DTEK has energised the largest battery storage project in the war-torn country and one of the biggest ones in Eastern Europe. The 200 MW/400 MWh installation ...

The European Bank for Reconstruction and Development (EBRD) is supporting Ukraine's energy security by lending EUR22.3 million to private Ukrainian energy company Power One for the ...

Powering 600,000 Households Once completed, the storage facilities will be capable of supplying electricity to up to 600,000 Ukrainian households. The project is part of a broader strategy ...

DTEK Group, a private investor in Ukraine's energy sector, has announced a EUR140m investment plan to construct a series of battery energy storage systems (BESS) in the country with a ...

# Ukraine green energy storage project

200 MW Battery Storage Connected to the Grid DTEK Group, in partnership with American company Fluence, has officially connected Ukraine's largest battery-based energy storage ...

Total investment in the project by DTEK amounts to EUR125 million. The energy storage systems will provide Ukraine's power grid with a higher level of resilience and stability, while also ...

The EUR140 million total investment aims to enhance power grid stability, bolstering Ukraine's energy security and independence. The project will be the biggest operational energy storage portfolio in ...

Experts report that energy storage systems will provide Ukraine's power grid with additional resilience and stability. The project also promotes the development of green energy and ...

In 2025 Ukraine deployed around 1.5 GW of new solar capacity driven by strong interest in co-located battery energy storage systems. BasenPower breaks down the key drivers, policy ...

The energy storage systems in this project are equipped with grid-forming capabilities, enabling them to independently restore local grid operations during power outages. This functionality ...
