Radio communications are a critical link in the ATC system. The link can be a strong bond between pilot and controller or it can be broken with surprising speed and disastrous results.

In traditional wireless communications, it can refer to the hub of a dispatch fleet such as a taxi or delivery fleet, the base of a TETRA network as used by government and emergency services or a CB shack.

Pilots need to maintain vigilance in monitoring the correct and appropriate aircraft radio communication frequencies for potential traffic conflicts and hazards.

The Aeronautical and Fixed Service includes stations used for ground-to-air communications with aircraft about aviation safety, navigation, or preparation for flight.

WRC-2015 agreed that assignments to stations of geostationary FSS satellite networks operating in 10.95-11.2 GHz (space-to-Earth), 11.45-11.7 GHz (space-to-Earth), 11.7-12.2 GHz (space-to-Earth) in ...

This document provides specification for a Mode S ground station used for Surveillance functions.

The HF-GCS has multiple transmission sites in different countries to ensure they can transmit worldwide, thus the name "Global Communications System". Each of the sites also has an ALE call sign.

View Ch. 5 Notes.pdf from EMT A150 at Orange Coast College. Chapter 5 - Communication EMS Communications System Components of an Emergency Communication ...

Base station antennas direct the radio signals away from the building or mast to obtain coverage in a certain area. The intensity of the radio waves is drastically reduced as the distance increases from ...
