Are rooftop solar panels a cost-effective option?

Rooftop solar panels are usually the most cost-effective option if you have a viable South, West or East facing roof with enough space to build your array. Use our easy solar panel calculator to get a quick estimate of how many solar panels you'll need for your home.

What is a DIY roof mount solar panel system?

DIY roof mount solar panel systems are solar panel kits designed for installation on rooftops. They make use of your home's rafters to support the weight of the solar array. Shop our selection of DIY roof mount solar panel kits for both grid-tied and off-grid properties. Roof mount systems are the standard choice for most home solar installations due to their convenience and cost-effectiveness.

Should you put solar panels on your roof?

Installing solar panels on your roof is suitable if you have limited yard space and cannot fit a ground mount on your property. A viable South, West or East facing roof with enough space to build your array makes rooftop solar panels the most cost-effective option.

What is a solar roof?

A solar roof, also known as a "photovoltaic roof" or "solar panel roof," is a type of roofing system that is designed to generate electricity from the sun's energy. It typically consists of solar tiles or solar shingles that are integrated into the roofing material.
