The study proposes using low power wind turbines to supply a telecommunication site near Palermo, Sicily. Annual energy requirements for the radio station are approximately 10,926 kWh. Vertical axis ...

Discover how widespread wind power is in Italy today and where it is being produced.

This large-capacity, modular outdoor base station seamlessly integrates photovoltaic, wind power, and energy storage to provide a stable DC48V power supply and optical distribution.

SummaryOverviewOffshore wind powerGallerySee alsoExternal linksIn 2001, the European Commission issued its Directive on Electricity Production from Renewable Energy Sources. The Directive set a goal for Italy to obtain at least 25% of its electricity from renewables by 2010. The 1999 Italian "White Book" targeted to install 2,500 MW of wind power capacity by 2010; Italy exceeded this in 2007. The Italian government targeted 12,000 MW by 2020. Given that Italy's recent growth in wind po...
