-----

Unlike their bladed counterparts, bladeless wind turbines don't have the familiar spinning rotors. Instead, they have a tall, thin profile and oscillate in ...

Thankfully, there is a 2,400 W garden-sized bladeless power solution that is so unconventional that it might just work when the weather won't. ...

This is the idea behind Vortex Bladeless a Spanish startup that has developed an innovative wind turbine without blades, capable of generating ...

Vortex Bladeless is a vortex-induced vibration resonant wind generator, in contrast to horizontal-axis wind turbines (HAWT) and vertical-axis wind turbines (VAWT) that work by rotation.

Eco-friendly bladeless small wind energy. Startup technology Vortex wind power for on-site generation, the low-cost wind turbine which is not a turbine!

A slender and circular cross section wind generator whose diameter is variable according to height is proposed for achieve this mission. To maintain the resonance in a wider range of wind speeds, a ...

Bladeless turbines, by contrast, could fit seamlessly into urban environments. Their compact, upright form makes them less obtrusive. They are ...

To capture wind from all directions, some have developed bladeless wind energy turbines in the shape of an "inverted megaphone." Installed in ...

France has taken a bold step into the future with bladeless wind turbines, harnessing wind energy in a whisper instead of a roar. This innovation offers a potential answer to the aesthetic, ...

Revolucionaria e&#243;lica sin aspas con aerogeneradores m&#225;s simples, silenciosos y baratos para

# Wind generator without blades

energía distribuida; La turbina eléctrica que no es una turbina!

Similar to a traditional alternator, our device gets an interaction between coils and magnetic fields, generating electricity by electromagnetic induction without need for rotation on a shaft nor a gearbox.

A bladeless wind turbine, designed by the Spanish startup Vortex Bladeless, uses a vibrating upright cylinder to harvest wind power. Nicknamed ...

On a wind plateau in Normandy, engineers have unveiled one of the most elegant energy systems ever: a wind turbine without blades. No spinning blades. No gears. No noise. Just a slender ...
