-----  
How much does wind energy cost?

Between June and July, the market prices for onshore and offshore wind both increased dramatically, reaching 0.278 Euro/kWh and 0.287 Euro/kWh, respectively owing to an exponential increase in demand. Procurement Resource provides latest prices of Wind Energy.

What is the global wind power market size?

The global wind power market size was estimated at USD 97.05 billion in 2024 and is projected to reach USD 141.09 billion by 2030, growing at a CAGR of 4.9% from 2025 to 2030. The growing need to replace conventional sources of energy with renewable sources is projected to drive the market for wind power in the upcoming years.

What is the wind power market outlook?

The report offers historical and forecast data and analysis of wind power capacity and generation. Additionally, the wind power market outlook covers the geo-political scenario, major active and upcoming plants, market size, and market drivers and challenges for twelve key wind power market countries.

How will wind energy prices change in 2024?

According to Procurement Resource, as global investment in wind power increases and new policies foster growth, Wind Energy prices are expected to stabilize and potentially decrease, with more competitive market conditions supporting its growth in the coming years. Wind Energy Trend for the First Half of 2024

Under the trend of "anti-involution", wind turbine prices will rebound in 2024, and the installed capacity and winning bids of wind power will hit a record high. "It is estimated that in 2024, China's new grid ...

Executive Summary Executive Summary The 13th annual Cost of Wind Energy Review uses representative utility-scale and distributed wind energy projects to estimate the levelized cost of energy ...

Factors that affect the cost of wind energy The levelized cost of energy from on- and offshore wind power plants is affected by five primary factors: annual energy production, investment costs, O& M costs, financing costs ...

# Wind power system price trends

The global wind power market size was estimated at USD 97.05 billion in 2024 and is projected to reach USD 141.09 billion by 2030, growing at a CAGR of 4.9% from 2025 to 2030. The growing need to replace ...

Procurement Resource offers Wind Energy trend analysis, news updates, and a database with market prices. Use our graphing tool to track price changes over time, compare rates globally, and customize data.
